(d) Dogs that are not acclimated to the outdoor temperatures prevalent in the area or region where they are maintained, breeds of dogs that cannot tolerate the prevalent outdoor temperatures without stress or discomfort (such as short-haired breeds in cold climates), and sick, infirm, aged or young dogs may not be kept in outdoor facilities unless that practice is specifically approved by the attending veterinarian.

§ 21.23. Space.

(a) Primary enclosures shall be constructed and maintained to provide sufficient space to allow each dog to turn about freely and to stand erect, sit and lie down in a comfortable, normal position.

(b) Each dog housed in a primary enclosure shall be provided with a minimum amount of floor space, which shall be calculated according to the following procedure:

- (1) Measure the length of the dog, in inches, from the tip of its nose to the base of its tail.
- (2) Add 6 inches to that number.
- (3) Square that sum.
- (4) Divide that product by 144.
- (5) That quotient equals the minimum required floor space for that dog, in square feet.

Example: A dog measures 24 inches from the tip of its nose to the base of its tail (Step 1). Adding 6 inches to that number (Step 2) gives a sum of 30 inches. Squaring that sum (Step 3) gives a product of 900 square inches. Dividing that product by 144 (Step 4) gives a quotient of 6.25. 6.25 square feet is the minimum amount of floor space which must be provided to that particular dog.

(c) Each bitch with nursing puppies shall be provided with an additional amount of floor space, based on her breed and behavioral characteristics, and in accordance with generally accepted husbandry practices as determined by the attending veterinarian. If the additional amount of floor space for each nursing puppy is less than 5% of the minimum requirement for the bitch, the housing shall be approved by the attending veterinarian.

(d) The interior height of a primary enclosure shall be at least 6 inches higher than the head of the tallest dog in the primary enclosure when it is in normal standing position.

(e) Subsections (b) and (c) do not apply if all of the following conditions are met:

- (1) The dog is located in a kennel that is licensed under the act solely as a pet shop-kennel Class I, II, III or IV.
- (2) The dog is being offered for sale on a retail basis, or has been sold and is awaiting physical transfer to its new owner.
- (3) The dog is maintained in a primary enclosure that keeps the dog on display to patrons of the pet shop-kennel during its normal business hours.
- (4) The primary enclosure meets one of the following conditions:
 - (i) Affords each dog sheltered therein at least 5 square feet for a dog weighing 25 pounds or less, 8 square feet for a dog weighing more than 25 pounds but not more than 45 pounds, and 12 square feet for a dog weighing more than 45 pounds.
 - (ii) Has been approved by the attending veterinarian, in advance and in writing, as being of adequate size to protect the health and well-being of the particular dog or dogs sheltered therein.

§ 21.24. Shelters.

(a) Dogs shall be provided access to shelter which protects them against inclement weather, preserves their body heat and keeps them dry. Housing facilities for dogs shall be constructed to provide for the health and comfort of the animals.

(b) Shelter shall be provided for dogs kept outdoors. Sufficient clean bedding material or other means of protection from the weather shall be provided.

(c) If dog houses with tethers are used as primary enclosures for dogs kept outdoors, the tethers used shall be placed or attached so that they cannot become entangled with other objects or come into physical contact with other dogs in the housing facility, and to allow the dog to roam to the full range of the tether. The tether shall be of a type commonly used for the size dog involved and shall be attached to the dog by means of a well-fitted collar that will not cause trauma or injury to the dog. The tether shall be at least three times the length of the dog as measured from the tip of its nose to the base of its tail and allow the dog convenient access to the dog house and food or water container.

(d) A dog may be sheltered in a primary enclosure having metal strand flooring provided the following conditions are met:

(1) The metal strand flooring is coated with a vinyl type coating.

(2) The coated metal strand flooring shall be kept in good repair.

(3) The coated metal strand flooring shall be made of mesh construction that does not allow the dog's feet to pass through any opening in the floor and does not otherwise cause injury to the dog.

(4) The coated metal strand flooring shall be constructed of sufficient diameter (gauge) to provide a completely rigid floor area sufficient to support the weight of dogs housed in the enclosure so that the metal strand floor does not bend or sag from the weight of the dogs.

(5) The dogs shall be provided with a draft free area that protects the dogs from inclement weather and is large enough to hold all the occupants of the primary enclosure at the same time comfortably.

(e) Coated metal strand flooring shall be installed by June 29, 2001. Coated metal strand flooring shall be installed prior to the removal of a solid resting surface. If a solid resting surface is provided, the solid resting surface shall be constructed of material that is impervious to water or moisture and shall be kept in a sanitary condition in accordance with § 21.29 (relating to sanitation).

(f) A dog may not be housed on a temporary or permanent basis in a drum or barrel dog house, regard-less of the material of which the drum or barrel is constructed.

- (b) Shade shall be provided to protect the dogs from the direct rays of the sun.

§ 21.26. Ventilation in indoor housing facilities.

Indoor housing facilities for dogs shall be sufficiently ventilated when dogs are present to minimize drafts, odors, ammonia levels and moisture condensation. Ventilation shall be provided by means of windows, doors, vents or air conditioners. Auxiliary ventilation from fans, blowers or air conditioners shall be provided when the ambient temperature is 85° F (29.5° C) or higher. The relative humidity shall be maintained at a level that ensures the health and well-being of the dog housed therein in accordance with generally accepted husbandry practices.

§ 21.28. Food, water and bedding.

- (a) Dogs kept in kennels shall be fed at least once each day unless otherwise directed by a veterinarian. The food shall be free from contamination or disease, and shall be of sufficient quantity and nutritive value to maintain the health of the dogs.
- (b) If potable water is not accessible to the dogs in their primary enclosures, potable fluids shall be offered to the dogs at least 6 hours daily unless otherwise directed by a veterinarian. The Department may require that a kennel licensee have samples of the water that it provides to dogs analyzed to confirm potability,

and may require a licensee to submit the results of the water analysis to the Department. The analysis shall be conducted at the licensee's expense. The Department may also sample and analyze the water.

(c) Food and water receptacles shall be accessible to dogs kept in the kennel and shall be located to avoid contamination by excreta. The receptacles shall be durable and shall be kept clean. Self-feeders and waterers may be used but shall be sanitized regularly to prevent molding, deterioration or caking of feed.
